Second Year FPST Classes
First Semester Exam of English Language/ 2022-2023 2-022/2023

Student's Full Name:..
Group ....

Read the text then do the taks below:

We spend a third of our day in the workplace, so it's only right that our work environments are kept as safe as possible. By not taking the necessary precautions and safety measures, employers run the risk of getting themselves into big trouble. Even worse, they run the risk of being responsible for someone's injury and even death in some cases. Needless to say, it's not something to take lightly.

By making sure that your business is taking the proper precautions and safety measures. you can protect your employees, customers, friends, family, property, business, and even yourself from any unnecessary mishaps. In many cases, businesses have been fined, sued, and even shut down for noncompliance with industry safety standards and for putting their customers and employees at risk. It's a shame that these things happen when so much of it can be easily avoided.

By taking some very easy and practical safety precautions, businesses can make the work environment safe for the employees that have to be there day in and day out. By doing so, not only will the workplace look better, but your employees will also feel better and safer about their jobs. It's no secret that happy employees carry a better work ethic than less happy employees, and this ultimately translates into a greater relationship with your customers and better business. With that said, why wouldn't anyone want a cleaner and safer work environment?

Don't wait to raise the bar on your standards of precautions and safety measures-start today

Tash One: Study the following statements carefully and circle true or false according to the text. (4pts)

1. Without precautionary measures employers will take nisks. [✓ True] False
