You might heard that elt is the most toxic module in all prepa , i wont say no but i have lil tips to help u get a good mark :

1- 1st chapter need lot and lot of practice, but lucky u i afford to u resources that may help u
-u must do td's exercises, u re gonna find solution of most of them in the folder under name Exo+solution
_ i suggest to u to try to solve all of them
THEY ARE REALLY HELPFUL

2- concerning chapter 2 and 3 td are enough just do them with full focus cuz evrything is related

3- u ll probably need some complex numbers in those two chapters but dont worry u wont need big things cuz u ll use calculator in most of the time , so learn to use calculator it will gain u extra time

⚠️ be carful when using calculator, pay attention if it is in Rad or Deg
